Education

TUFTS UNIVERSITY

Sep 2021 - May 2025

BS Degree, Computer Science — GPA: 3.77, Magna Cum Laude

- **Coursework:** Data Structures, Algorithms, Programming Languages, Web Programming, Database Systems, Intro to Security, Computation Theory, Linear Algebra, Digital Electronics, Electronics & Controls

Experience

CAMBRIDGE MOBILE TELEMATICS

Jun 2026 – **Present**

Software Engineer Intern

Cambridge, MA

- Designing the integration architecture for migrating Crash Team services to a new configuration system, including schema design and cross-team requirements gathering with the Platform Applications and Crash teams
- Authoring migration documentation and architecture diagrams intended as a reusable template for future CMT service migrations
- Implementing the migration using Python, AWS (S3), GitHub Actions, Jenkins, and JSON schemas

FENTON & ROSS ACCOUNTANCY CORPORATION

Dec 2025 – May 2026

Tech Consultant

Los Angeles, CA

- Build AI and Excel (VBA)-based automations reducing high-volume tasks from minutes to seconds
- Integrate AI-assisted workflows for tax projections, task management, and client communication
- Streamline internal processes across Canopy Tax, QuickBooks Online, and Excel while providing technical support

BUMBLE INC.

Jun 2024 – Aug 2024

Engineering Intern, AI Discovery Team

Remote – Los Angeles, CA

- Designed and implemented API backend infrastructure for machine learning model integration
- Optimized inference scripts through load testing, reducing latency and improving performance
- Deployed Dockerized services across dev and production environments for regional testing
- Trained and evaluated convolutional neural networks for recommendation tasks

UCLA INSTITUTE FOR CARBON MANAGEMENT

Jun 2022 – Aug 2023

Research Intern, Dr. Gaurav Sant

Los Angeles, CA

- Analyzed CO₂ absorption and desorption rates for direct air capture cells using Python data processing scripts
- Operated ICP-OES and on-line analyzers; conducted experiments on pH gradient effects on electrochemical capture efficiency

Projects

HANDDOWN – Backend Engineer

Sep 2024 – Sep 2025

- Conducted market research across marketplace and consumer apps (Facebook Marketplace, Tinder, Instagram) to inform a dual-mode UX: a filter-based grid search for intentional browsing and an algorithm-driven swipe feed for passive discovery
- Surveyed students and validated the concept at a campus demo session with parents and prospective students
- Led backend architecture and coordinated team meetings and task delegation across a 3-person team, owning database design and API infrastructure

ARITH

Feb 2024 – Mar 2024

- Implemented a compressor and decompressor in C to execute lossy image compression from a ppm file to a compressed binary file using a bitpacking interface

GREP

Nov 2022 – Dec 2022

- Created implementation of grep with a partner to search for inputted word phrases in a directory tree containing text files
- Utilized std::vector and std::functional to create 2D hash in C++ to store mentions of every word in a given directory

Skills & Interests

- **Programming Languages:** Python, C++, C, SQL
- **Tools & Technologies:** AWS, FastAPI, Docker, Firebase, PostgreSQL, Git/GitHub

Leadership & Activities

TUFTS UNIVERSITY BEELZEBUBS

Sep 2021 – May 2025

Operations Director (2022–2023)

- Invited to perform at the White House Christmas Party, College Notes Festival (San Francisco), and Hong Kong International A Cappella Festival 2025
